About Me

As a skilled web developer, I specialize in creating dynamic and responsive web applications using a robust technology stack. My expertise spans HTML5 for structured content, CSS3 for compelling design and layout, and JavaScript for interactive client-side functionality. I leverage jQuery to simplify complex JavaScript operations and AJAX for seamless asynchronous data exchanges. On the backend, I work with PHP for server-side scripting and ASP.NET for building powerful web applications, complemented by MySQL for efficient database management. Additionally, I develop cross-platform mobile applications using Flutter, enabling consistent, high-performance experiences on both Android and iOS.

This comprehensive skill set allows me to deliver full-stack web and mobile solutions that are technically sophisticated, user-friendly, and capable of meeting modern digital challenges.

WORK EXPERIENCE

Pitason & SmartPro

Web developer

may 2024 -till date

- Reviewed existing software code to identify potential issues or areas of improvement.
- Informed project manager of milestone updates and provided detailed project reports.
- Collaborated effectively with team members while maintaining strong sense of individual responsibility.
- Employed integrated development environments (IDEs).
- Engaged in back-end development activities, focusing on database management and server-side logic.
